

CERTIFICATE COURSE

Data Analysis, Visualization and Outreach

A residential monsoon training programme under AAETI's School of Development Communication

What gets measured, gets managed goes the saying. But it misses out on a crucial link: what gets measured must be analyzed and communicated. If it is not, it cannot be managed. We live in a time of an over-abundance of data in every field. Every piece of this data, when analyzed, reveals a minefield of information. Unanalyzed, it is no good. But processed and communicated well, it becomes an excellent outreach tool, capable of making far-reaching impacts.

Anil Agarwal Environment Training Institute (AAETI), a Centre for Science and Environment initiative, brings you a five-day course on reading numbers and data, making sense of them, and using them to inform, influence and impact. The course will help you develop skills for searching the data which is most relevant for you; analyse, visualise and interpret it; and translate it into actionable information.

OPEN FOR

Professionals working with non-profits, media, government agencies, research institutions, academic centres and industry anyone who wants to sharpen the basic skills of data analysis and presentation for communicating research, reports and stories using numbers.

THE KEY TAKEAWAYS

- Basics of statistics and data analysis
- Open data and big data on socio-economic development
- Smart tools and techniques to find the right data to tell your stories
- Using data for impactful communication and outreach, informed decision-making and effective governance
- Data visualization techniques (for news, reports, research papers, studies, proposals, etc)

COURSE DURATION

August 21-25, 2018

COURSE VENUE

AAETI Campus, Nimli,
Alwar, Rajasthan

LAST DATE FOR RECEIVING APPLICATIONS

August 1, 2018

CSE's decision on shortlisted names would be final.

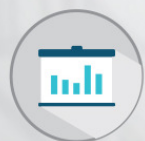

COURSE FEES

- ₹21,400 per person (for double occupancy hostels)
- ₹33,000 per person (for single occupancy hostels)
