

The group exercises and discussions are the integral parts of the training programme. In order to give sufficient time for preparation, a set of questionnaire has been given below in advance. The questionnaires will be part of group exercises and discussions in respective sessions of the training programme. As per the programme agenda, each participant will get opportunity to present his/her answers/views. You are requested to keep the answers ready to actively participate in the training programme.

Questionnaire- I

Continuous Emission Monitoring System (CEMS)

1. What is the status of implementation of CEMS initiative in your region?
2. What are the key challenges you face in implementation (installation, inspection, data submission etc.) of CEMS?
3. What are the responsibilities you have been assigned for CEMS?
4. What responsibilities you feel SPCBs should have?
5. Do you feel that the present regulatory framework of CEMS (regulations, directions etc.) is perfect? What improvements you will suggest to make CEMS implementation initiative successful?

Questionnaire- II

Compliance enforcement of new environmental norms in Power Sector

1. What is the implementation status of new environmental norms for coal based power plants (number and % of plants) in your region? What is emission range plants are achieving presently?
2. Do the Consents for upcoming power plants already include provisions to meet the new environmental norms?
3. What are the plants' broad plans to comply with the new norms?
4. What is the SPCBs current role (in developing broad plans, setting timelines etc.) in order to implement new norms?
5. What additional role should be assigned to SPCB officials to ensure timely implementation of the new norms?
6. What are the key challenges SPCBs face in implementation and compliance enforcement of the new norms?

In case of any clarification in this regard, please feel free contact:
