National Policy on Online Monitoring

In “National Environment Policy- 2006” it is envisaged that to strengthen the testing infrastructure and network for monitoring ambient environmental quality and progressively ensure real-time, and online availability of the monitoring data

Goals of Online environmental monitoring system

- *Real-time Data is dynamic and continuous
- *Improved control over impacts on the environment
- *Higher environmental awareness
- *Increased management responsibility for regulatory compliance
- *Self Monitoring mechanism within the industries
- *Increased cost-effectiveness (minimize inspection)
- *Increased public access to information(Public Domain)
