Online Course on

‘Green Infrastructure – Effective Measures to Manage Urban Flooding and Water Supply’

Course Dates: 02 February to 29 February 2020  Last Date to apply: 29 January, 2020
Total Study Hours: 24 hours (6 hours per week)

Green infrastructure provides a new concept - a ‘smart’ method for natural conservation and urban planning. It is high time we realize that ecosystems are not a frill but a necessity. This online course will help students, working professionals and environmental enthusiasts learn state-of-art concepts and principles of green infrastructure for improved urban water management at their own comfort and pace.

Themes:
- Introduction to GI for urban spaces
- Understanding GI approach and interventions
- Stakeholder analysis and socio-economic benefits of GI
- Best management practices and Case studies on GI

Course fee:
- ₹3500/- Indian participants
- US$ 100 Overseas participants
