As global commitment to combat climate change intensifies, industries worldwide are under increasing pressure to adopt sustainable practices. In India, rapid economic growth and rising consumer demand have led to significant increases in energy consumption and raw material usage. This, in turn, has heightened the need for industries to align with the country’s Nationally Determined Contribution (NDC) target of reducing GHG intensity by 45 per cent below 2005 levels by 2030. Achieving this ambitious goal requires industries to adopt meticulous carbon/GHG accounting, rigorous auditing, and effective trading mechanisms to monitor and manage their carbon footprints.

Centre for Science and Environment (CSE) invites applications for its intensive four-day training course on ‘Carbon: Accounting, Auditing and Trading’, aimed at empowering industries, aspiring carbon auditors and experts, consultants, regulators, academicians and related professionals with essential knowledge and skills needed for robust management of GHG emissions. The programme will equip its participants with the skills and ability to develop and implement strategies that not only comply with regulatory requirements but also enhance their competitive edge in the global market.

**THE COURSE CONTENT AT A GLANCE**

- Climate change and the role of industry
- Greenhouse gases (GHGs), their sources in industrial sectors, and their impacts
- Inventory management of GHGs
- Need for carbon/GHG accounting for industries
- Methodologies for GHG/carbon emission inventory and management
- Principles, methodology, checklist and practice of carbon auditing and verification
- International standards and best practices
- Experiences from emission trading schemes from across the world
- Indian carbon markets
- Carbon offsetting and associated risks
- Financing decarbonisation through carbon markets: A reality or myth?
- Impacts of global policies like CBAM on Indian industries
- Avenues for financing industrial decarbonisation

**COURSE FEE**

**₹28,000**

- Course fee includes the costs of lodging, boarding, training, and travel from Delhi to the training centre and back.
- It does not cover travel costs from a participant’s home town/location to Delhi and back.
- Sponsorships are available for participants from government ministries and departments.
