An excreta flow diagram (also often described as shit flow diagram, SFD) is a tool to readily understand and communicate how excreta physically flows through a city or town. The fate of excreta produced by populations across the globe is often poorly understood. SFDs show how it is or is not managed as it moves from defecation to disposal or end-use.

With more than 100 SFDs (70 + in Ganga basin states & the rest for other cities in India) CSE has made a considerable contribution to support the production and review of good-quality SFDs as well as help train practitioners. We are overwhelmed with the demand for SFD trainings. So, with the travel restrictions in place, we are pleased to announce the International Virtual Training Programme to cater to this demand.

Target Group

Decision Makers, planners, engineers, developers, executive officers, WASH experts, water and sanitation enthusiasts, Non-profits, government departments & agencies, consultancies and research institutions.

Part 1: Context-setting (Online Platform): 21st September to 29th September 2020

Setting the context on understanding need for SFDs, what is an SFD (graphic and report), evolution of SFDs and various application of SFDs. This module will be conducted through an e-learning platform, where participants will be provided with 8-10 hours (approx.) reading / audio-visual training material which they are expected to self-study. The platform will also allow participants and trainers to hold discussion threads where necessary.

Part 2: Action learning (Virtual Sessions): 30th September to 2nd October 2020

Day 1: How to read an SFD? 3-hours

1.5 hr lecture, 1 hr group exercise and 0.5 hr QnA

Day 2: Methodology for Data Collection and Analysis 3-hours

1.5 hr lecture, 1 hr group exercise and 0.5 hr QnA

Day 3: Preparation of SFD Graphic and Report. 4-hours

1 hr lecture, 2 hr group exercise, 1 hr discussion and QnA

Training fee for international participants: **\$100**; for national participants: **INR 3,500**
