

Online Training Course

DRIVING CLEAN AIR: STRATEGIES TO REDUCE EMISSIONS FROM TRANSPORT

COURSE DATES: **OCTOBER 17-28, 2026**

Rapid urbanisation has led to deteriorating air quality in our cities. A total of 130 non-attainment cities/million-plus cities and urban agglomerations are implementing clean air action plans under the National Clean Air Programme (NCAP) and XVth Finance Commission funds. With increasing motorisation transport sector remains a major contributor to overall pollution concentration, emissions load and public health exposure. Reducing transport emissions has remained a complex challenge and requires multiple strategies for implementation to reduce emissions and decarbonise the transportation sector.

CSE is organising this online training course for deeper understanding of the strategies needed to reduce emissions from vehicles and urban transport sector. These include technology roadmaps, on-road emissions management to control real-world emissions, phase-out of old vehicles and scrappage for emissions gains and material recovery, fleet renewal, vehicle electrification, sustainable mobility strategies etc.

WHO CAN APPLY?

Government officials from departments and agencies involved with transport sector strategies, professionals and practitioners helping with strategy development in cities, academicians, researchers and students aiming to enrich curriculum and shaping careers in this sector, among others

Participants will be awarded a certificate of participation on completion of the course

COURSE FEE

Rs 3,500
for Indian participants

US \$100
for International participants

This course will be conducted on the Moodle and Zoom platform through a variety of tools such as video lectures, reading materials and resources, audio/visual methods including short films, interviews etc.

MODULE 1

- Understanding urban air pollution, public health and transport sector emissions

MODULE 2

- Technology roadmaps and new generation strategies to control real world emissions

MODULE 3

- Towards zero-emission electric vehicles

MODULE 4

- Bus transport reforms and electric mobility in cities

MODULE 5

- Integrating active mobility, parking management and low emission zones

MODULE 6

- Transport and mobility data analytics
