ONLINE COURSE ON

SAFE WATER, SANITATION AND HEALTH FOR ALL DURING AND POST COVID-19

Course Dates
September 14 - October 12, 2020

Last Date to apply
September 04, 2020

Total Study Hours
24 hours (6 hours per week)

The provision of safe water, sanitation and hygienic conditions is essential to protect human health during all infectious disease outbreaks, including the COVID-19. To address this, water and sanitation safety planning plays a vital role, being a risk based management tools highlighting the integration of the health sector and helps to bring a human health perspective to traditional non-health sectors like water services and sanitation engineering.

This online course aims to create change-agents who will have basic understanding about the concepts and principles of Sanitation Safety Planning (SSP) in order to ensure safe water and efficient management of sanitation services.

THEMES
- Linkage between water, sanitation and health: Current and future challenges
- Enabling environment for improved water and sanitation for all
- Tools and approaches for better water and sanitation planning and progress
- Water and sanitation safety planning: Risk based approach to protect public health

Top 5 scorers will get a 50% refund of their course fee
One-year free subscription to Down To Earth magazine after course completion
