

# **INTERNATIONAL ROUNDTABLE ON FAECAL SLUDGE MANAGEMENT FOR CITY-LEVEL OFFICIALS OF ETHIOPIA**

Addressing Issues, Challenges, and Bottlenecks  
for Sustainable Urban Sanitation

# **City-Level Roundtable on Faecal Sludge Management (FSM) in Ethiopia**

- The objective of this online meeting is to :
  - To experience sharing from India
  - To overview the sanitation progress in Ethiopia
  - To Identify Key Challenges and discussion
  - To discuss solution and action to be taken

# Ten Years Sanitation Strategic Development Plan (2020-2030)

## Strategic Directions of Sanitation

- Development of Urban Waste Water Infrastructure and strengthening of Management System
- Expanding urban and rural sanitation and environmental sanitation services to create a clean Ethiopia.

## Key Sanitation Goals

**Goal 1.** establishing a basic integrated waste water management system in 95 cities by end of 2030;

# FSM progress

- **World bank financed 23 town**
  - (Adama, Hawassa, Bahirdar, Mekele and Dire dawa )towns final stage for contract signing
  - (Gambela , Semera and Assossa) construction has reached **50%**
  - (Assela, Bishoftu, Shasemena, jimma amd Nekemete) town construction has reached **44.8%**
  - Dessie , Gonder and Deber berhan towns town construction has reached **47%**

- (Arba minch and Woilita sodo) towns construction has reached **23%**
- Harar town towns construction has reached **10%**
- **Adirat town** study and design has reached
- **Jijiga and Degehabour towns** still on final design review next stage on procurement process

## **6 towns IMPROVEMENT OF SANITATION FACILITIES IN URBAN AREAS OF ETHIOPIA ( water fund)**

- A sanitation improvement in urban area same principle as UWSSP focused on cost recovery principle
- The towns are
  - Burayu : FSTP construction site handover
  - Hossania: FSTP construction has reached 10%
  - Arartii: FSTP construction site handover
  - Butajira; FSTP construction has started
  - Fiche: FSTP construction site handover
  - Injibar: FSTP construction site handover

## **24 towns City wide inclusive sanitation plan , feasibility study and detail design of fecal sludge management system study**

- Project financed by the Ethiopian government treasury
- overall objective of the study is to conduct
  - situation assessment,
  - preparation of wastewater management development plan,
  - preparation of implementation guideline/ manual and priority setting criteria for selection of towns,
  - enabling realization of City-Wide Inclusive Sanitation (CWIS).
- progress is on the final stage of contract signing

## List of towns are planned for the study

Debre Tabor	Dukem	Kebridehar
Kombolcha	Legetafo	Shire Indesilase
Woldia	Mojo	Yirga Alem
Ambo	Woliso	Bonga
Batu	Debre Markos	Mizan (mizan Teferi)
Negelle Arsi	Finote Selam	Halaba
Robe	Togo Wichale	
Sebeta	Gode	
Dilla		
Wolkite		

## **Key Challenges in the Sanitation Sector**

- ☐ Weak awareness and less attention
- ☐ Unsafe Emptying Practices
- ☐ Gap in skill and experiences, and technologies
- ☐ High rate of Urbanization
- ☐ Weak legal enforcement
- ☐ Almost towns don't have WWM master plan or not addressed in overall Master Plan
- ☐ Space Limitations
- ☐ Finance Gap for both O&M and Investment
- ☐ Weak integration among the main players

THANK YOU!!
