ON LINE TRAINING ON

PRINCIPLES AND METHODS ON THE LABORATORY ANALYSIS OF SEPTAGE AND WASTEWATER

COURSE DATE
June 24-26, 2020

LAST DATE TO APPLY
June 20, 2020

COURSE DURATION
9 hours (3 hours per day)

LANGUAGE OF INSTRUCTION
English

WHO CAN APPLY
- Enthusiastic candidates working in the FSSM sector, Govt. NGOs etc
- University researchers / students

COURSE FEE
Rs 3,000 per participant

ABOUT THE TRAINING
Faecal Sludge and Septage Management is an emerging field of research with continual developments and improvements in methodologies adopted in the sector. This online course focuses on some of the most recent advances in lab analysis of important chemical and biological parameters for septage and waste water characterisation. This online training is part of the CSE and Bill Melinda Gates Foundation collaboration on FSSM in India.

AIM
Capacity Building in new research initiatives, sharing of knowledge & advances in FSSM science among various stakeholders

LEARNING OBJECTIVES
- Focused on important chemical and biological parameters of septage and waste water analysis
- QC check to ascertain confidence on analytical results
- Interpretation of results with respect to existing regulatory norms to protect environment
