

ONSITE TRAINING

BUILDING EIA EXPERTISE FOR ENVIRONMENTAL LEADERS

The Centre for Science and Environment (CSE) invites you to an immersive, four-day residential training on Environmental Impact Assessment (EIA), a critical tool for ensuring that development projects are environmentally sound and socially responsible. This intensive programme is designed for professionals and researchers seeking practical skills and a deeper understanding of India's EIA processes.

This training goes beyond theory. Participants will work through real-world case studies, review actual EIA reports, develop mitigation and monitoring plans, and engage in group exercises and role-plays based on sector-specific scenarios. With direct access to CSE's experts and a collaborative learning environment, this is an unparalleled opportunity to sharpen your technical skills and expand your network.

TRAINING FEES

INR 28,000

- Sponsored for selected Government officials - for eligibility contact the course co-ordinator via email.
- Training fees will include accommodation, meals, and travel between CSE's Delhi office and the training centre. Participants will be responsible for covering their own travel expenses to and from New Delhi.
