ENVIRONMENTAL LAW: DECODING INDIA'S EVOLVING REGULATORY FRAMEWORK

COURSE DATE: JUNE 13-22, 2026 | REGISTRATION DEADLINE: JUNE 10, 2026

India has enacted several landmark environmental laws—including the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, and the Environment (Protection) Act, 1986—to prevent and control environmental degradation. Over the years, the country has built a robust legal and regulatory framework to safeguard natural ecosystems and public health.

But as the country races ahead with its development agenda, the environmental landscape is shifting just as rapidly with updates rules and advancing tools shaping the way government authorities approach environmental management. With such rapid evolution of environmental frameworks, for anyone working in this space, staying updated is no longer optional — it's essential. From new waste management rules the growing role of environmental courts, understanding the legal landscape is crucial for anyone engaged in environmental work today.

To address this need, the Centre for Science and Environment (CSE) is organizing this 10-day online training programme that unpacks environmental regulatory scenario in India. It will address key environmental laws, latest amendments and notifications across these laws, and the practical significance of these laws in driving sustainable environmental governance.

Whether you're from industry, academia, civil society, or government, this course will help you build a solid foundation in environmental law—and apply it meaningfully in your work!

OF THE
ASSESSMENT**

ONLINE - SELF STUDY FORMAT

- Self-paced course hosted on the Moodle platform.
- New pre-recorded sessions (approx. 2 hours/day) released daily.
- All content remains accessible throughout the course.
- Dedicated discussion forum for queries

KEY LEARNING OUTCOMES

- Build a strong foundation in India's core environmental laws, including the Environment (Protection) Act, 1986; Air (Prevention & Control of Pollution) Act, 1981; and Water (Prevention & Control of Pollution) Act, 1974.
- Master the principles, institutional structure, and governance mechanisms underpinning India's environmental regulatory framework.
- Analyze emerging policies and rules for waste management, including municipal, plastic, and e-waste regulations.
- Stay updated on wildlife and forest laws, including relevant Acts and notifications.
- Gain knowledge of processes and protocols for Environmental and CRZ (Coastal Regulation Zone) clearances;
- Understand the role and functioning of adjudicatory bodies, including the National Green Tribunal (NGT) and environmental courts, in enforcing environmental laws;
- Recognize responsibilities and obligations for industries and individuals under key environmental laws, and learn practical strategies to meet them.

WHO CAN ATTEND

- Industry professionals, Environment consultants, and engineers
- Researchers/academicians
- Civil society organisations
- Students aspiring to work in the field of environment

TRAINING FEES

INR 4000 (Indian participants) | For Training Link, [click here](#)
