

RESIDENTIAL TRAINING

LEVERAGING AGROECOLOGY FOR LIVELIHOOD

This is a CSE-supported training. We have limited seats available, which will be offered on a first-come, first-served basis. Interested persons should apply well in time.

Agriculture faces growing challenges from climate change, biodiversity loss, declining soil health and changing markets. Agroecology offers a pathway to build more climate-resilient farming systems while conserving biodiversity, strengthening livelihoods, and creating new opportunities for farmers.

Centre for Science and Environment (CSE) invites applications for a two-day training programme that will help practitioners explore practical approaches to agroecology and biodiversity-based livelihoods. The training will focus on experiences and solutions from across India. The deliberations at the programme are expected to inform recommendations for policy improvement.

HOW WILL THE PRACTITIONER BENEFIT?

The training aims to create a cadre of practitioners who: ■ Understand the importance of agrobiodiversity for farming, food systems and livelihoods ■ Explore practical agroecological approaches that enhance climate resilience ■ Learn from successful experiences ■ Understand opportunities for value addition, product development and market access ■ Know ways to leverage policy and institutional support ■ Are a part of networks for collaboration and knowledge exchange ■ The practitioner will also get access to a wealth of CSE resources and content material.

CLICK HERE TO REGISTER

Date: September 29-30, 2026

Venue: Anil Agarwal Environment Training Institute (AAETI), Nimli, Rajasthan

Last date to apply: September 15, 2026

Medium of Instruction: Hindi and English

Only the shortlisted participants will receive a confirmation on email and whatsapp with further details about the programme.

TRAINING FEES

CSE will cover the costs of boarding, lodging, conference/training, and travel between New Delhi and the AAETI campus. Upon reaching Delhi, participants will be directed to a common pick-up point for travel to Nimli and dropped back at the same point on their return journey. Please let us know if you need help with travel to Delhi; a limited number of participants can be provided with train fare.

WHO WILL BENEFIT?

- Farmer Producer Organisations
- Community-Based Business Organisations
- Self-Help Groups
- District-level government officials
