

## ONLINE TRAINING ON WATER EFFICIENCY AND CONSERVATION

Date  
**MARCH 17 - 28, 2023**

Last date to apply  
**MARCH 12, 2023**

Course Duration  
**16 HOURS**  
(self-paced – 8 hours and  
virtual sessions – 8 hours)

Platforms  
**ZOOM AND  
MOODLE**

### ABOUT THE TRAINING

The training will focus on providing conceptual understanding of the measures to be adopted in order to mainstream water-use efficiency and conservation at various scales of planning (city, neighbourhood and individual scale) in urban areas. Along with this, the training will help in learning about the tools, techniques and the applicability of initiating WEC practices.

This online training is a part of series of activities envisaged under a 3-year programme – 'Capacity building initiative focusing on 'Making Ganga basin cities water sensitive'. Under this initiative series of – webinars, workshops, trainings, field exposure visits, knowledge conclaves are planned, aimed at engaging 1,300+ state/ municipal functionaries and other sector players. The programme is supported by National Mission Clean Ganga and is part of the series of ongoing efforts by NMCG.

### AIM

To enhance the knowledge of government officials/ practitioners about concepts and applicability of water-use efficiency and conservation measures in urban India.

### WHO CAN ATTEND?

- Central / State / Municipal functionaries (decision makers / managers and regulators): Planners (Urban/ Regional/ Environment), Engineers, Architects / Landscape Architects working in Town & Country Planning / Municipal Administration Department or State Urban Development Authorities
- Engineers (Civil / Mech./ Envtn.) or Planners working with Water Supply and Sewerage Boards / Jal Nigam or Jal Sansthan etc.
- Any other programme dealing with water, sanitation, flood, river, wetland or environment related matters in the city and its urbanizable areas

### BENEFITS OF PARTICIPATION

- Training participation/ completion certificate
- One-year free subscription to Down To Earth magazine after training completion
- Top 3 most active participants will be invited to AAETI, Nimli, Rajasthan with a fully funded fellowship for one of our upcoming training programs.
- Join a global network of practitioners of the School of Water and Waste

### COURSE FEES

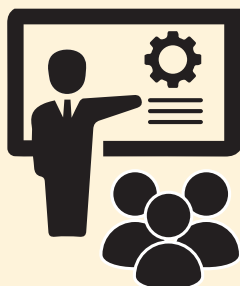

₹ **3,500** for Indian participants  
**US \$75** for Global participants.

Early bird entries (till March 10th) and a group of more than three participants in each batch can avail a discount of 25 per cent. (Applicable for all participants)

**Note:** No training fee is applicable to nominated government employees

### TRAINING HIGHLIGHTS

- Overview of existing issues and challenges in the water management in urban areas both at national and global level.
- Learn about the concept of WEC and its measures focusing on rainwater harvesting, water conservation and reuse of treated wastewater.
- Understand the tools, techniques and applicability of WEC planning.

- Understand national missions, programmes, and standards applicable for mainstreaming water efficiency and water conservation in India.
- Supported by Best Management Practices (BMPs) and case studies of successfully implemented projects both at national and international.
