

Panellist	Question
Divya Sinha, Scientist, CPCB	How much plastic waste is India producing, and what is our country's capacity to recycle plastic waste?
Siddharth Hande, Founder/ CEO, Kabadiwalla connect	In your opinion, how can the informal sector be integrated, given the fact that they rely majorly on non-scientific methods of recycling. Will government intervention of providing them with relevant infrastructure and capacity building help to improve the situation?
Pratibha Priya, Chief Sustainability & Marketing Officer, Lucro Plastecycle.	Could you share your thoughts on the packaging sector plastic waste? What percentage of it is theoretically recyclable, and how much of it does get recycled? Is it concerning?
Zulkif Shaikh, Co-founder, Sanjeevani S3.	How many formal recycling units did you find while your fieldwork in Mumbai and what's your take on band-aid solutions like waste to energy, plastic to fuel, co-processing in cement kilns, road making, etc. which seems to be gaining popularity amongst producers and recyclers alike?
