ONLINE COURSE ON

‘WATER WOES-REALITY OF URBAN WATER MANAGEMENT’

Cities in India and South Asia are spiralling. Our climate is changing, making cities more prone to extreme rain events and floods while water scarcity and pollution continue to grow. Water problems jeopardise the survival of millions of people globally. This online course will provide a holistic perspective on today’s water scenario and emphasize the need to move towards a water secure future.

Course Dates: May 04 - June 06, 2020
Last date to apply: April 29, 2020
Total Study Hours: 28 hours (6 hours a week)

THEMES:

• Water and Development – What Works and What doesn’t
• Making Water Everybody’s Business
• Learning from Nature – The Dying Wisdom
• Tools and Approaches to operationalize interventions

It features technological learning tools such as presentations, videos featuring case studies, interviews with experts, inspirational talks, and other audio and reading material.
