

TOWARDS WATER SENSITIVE CITIES FOR CLIMATE RESILIENCE

EXPERIENCE OF APPROACH AND PRACTICES IN INDIA

Date: August 25, 2022

Time 11:00 AM – 13:00 PM (IST)

Language: English | **Platform:** Zoom

This webinar will deliver a range of informative and engaging sessions to enhance participants' knowledge on water sensitive design and planning approaches aimed at building city-wide resilience, and concepts related to water resilience to discussion on good practices and WSUDP implementation. The webinar aims at sensitizing practitioners and advocating for the planning and designing of water-sensitive cities in India, and disseminating the experiences of water-sensitive cities and exemplar projects and programmes from India.

KEY HIGHLIGHTS

- Developing an India contextualised WSUDP and Water Sensitive Cities understanding. Identifying tools, techniques and approaches. Learning from exemplar projects and programs that have adopted water sensitive principles and technologies in India.
- Opportunity to learn from the experience in India, focussing on cities of Odisha, Bangalore, Delhi, Chennai and Kochi – in terms of the research, policy, governance and implementation over the years.
