

CONCLAVE 2021

CSE's Annual Green Educator's Network Meet

The New World (Dis)order

Building a better and greener world in the post-pandemic era

Medecins Sans Frontieres

- International medical humanitarian organization
- Natural disasters, Conflict, Epidemics, Famines, Populations excluded from healthcare
- Provides independent, impartial medical treatment and assistance in 60 countries
- MSF teams around the world are working in some of the hardest hit countries and facing challenges providing COVID-19 care in countries like Brazil, India, Lebanon and Peru.

Old problem, New Face

- Developed countries placed large advance orders for 2009-H1N1 vaccine and bought virtually all the vaccine companies could manufacture
- For HIV/AIDS it took over a decade of protests, legal battles and WTO declaration (Doha) to start the supply of affordable generic antiretrovirals due to patent barriers. Millions lost their lives waiting.

Its happening again!

Why are medicines so expensive and short supply?

Drug patent systems can
be manipulated and abused

**limiting market
competition**

and blocking
affordable
alternatives

“

WHAT WE AS A CIVIL
SOCIETY DEMAND IS

CHANGE

NOT CHARITY
