SFD Week, CSE

April 3, 2019

Wai & Sinnar: *1st cities to implement scheduled desludging services in India*

- **Wai & Sinnar – Located near Mumbai**
 - Population - Sinnar ~70,000
Wai ~40,000
- **Pioneer Indian cities in FSM**
 - **1st city** - Performance linked annuity model for scheduled desludging in India
 - **1st city** - Levying a sanitation tax for FSM
 - **1st city (Sinnar)**- Setting up FSTP on DBO model
(Fully funded by local government)

Challenges in FSSM

Demand Desludging

v/s

Scheduled Desludging

- Desludging is done on-call basis
Desludging frequency – 8-10 Years
- Desludging services treated as a complaint redressal system
- Not all HHs receives services and often pay very high charges
- Low frequency of desludging leads to increase pollutant load
- Difficult to monitor private informal providers.

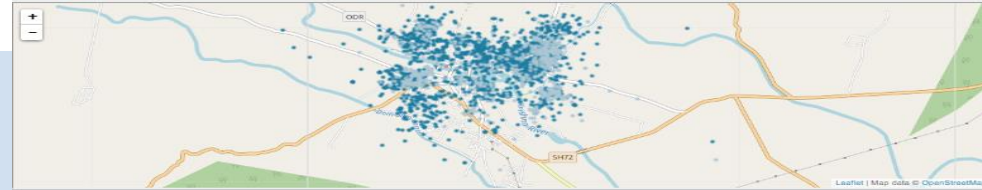

- Septic tanks desludged once in three years on scheduled basis
- Service provision + regulations to ensure scheduled desludging
- Equitable and affordable: Citywide coverage and levied sanitation tax
- Likely reduction in pollutant loads and coliform in septic tank effluent
- Regulated and monitored by ULB through service contract

SaniTab

- Android-based tool for sanitation survey
- Citywide digital data collection tool
- Capture household / property level data
- Creating onsite sanitation database

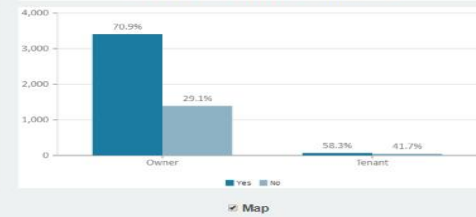

Wai Municipal Council: Baseline Sanitation System Assessment

Households having latrine facility within premises

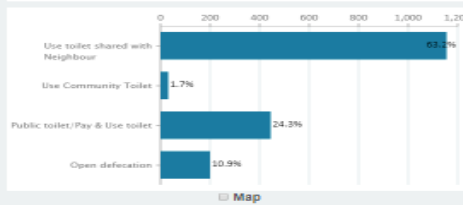

% having latrine facility within premise

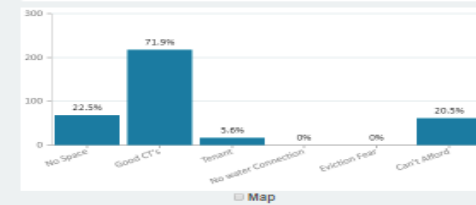

Households without toilets

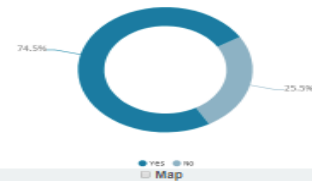

where do Households without toilet defecate?

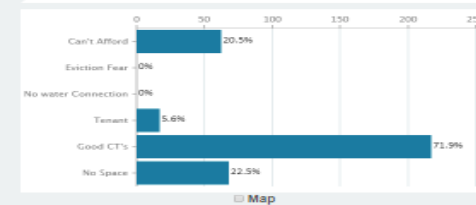

Reason for not having toilet

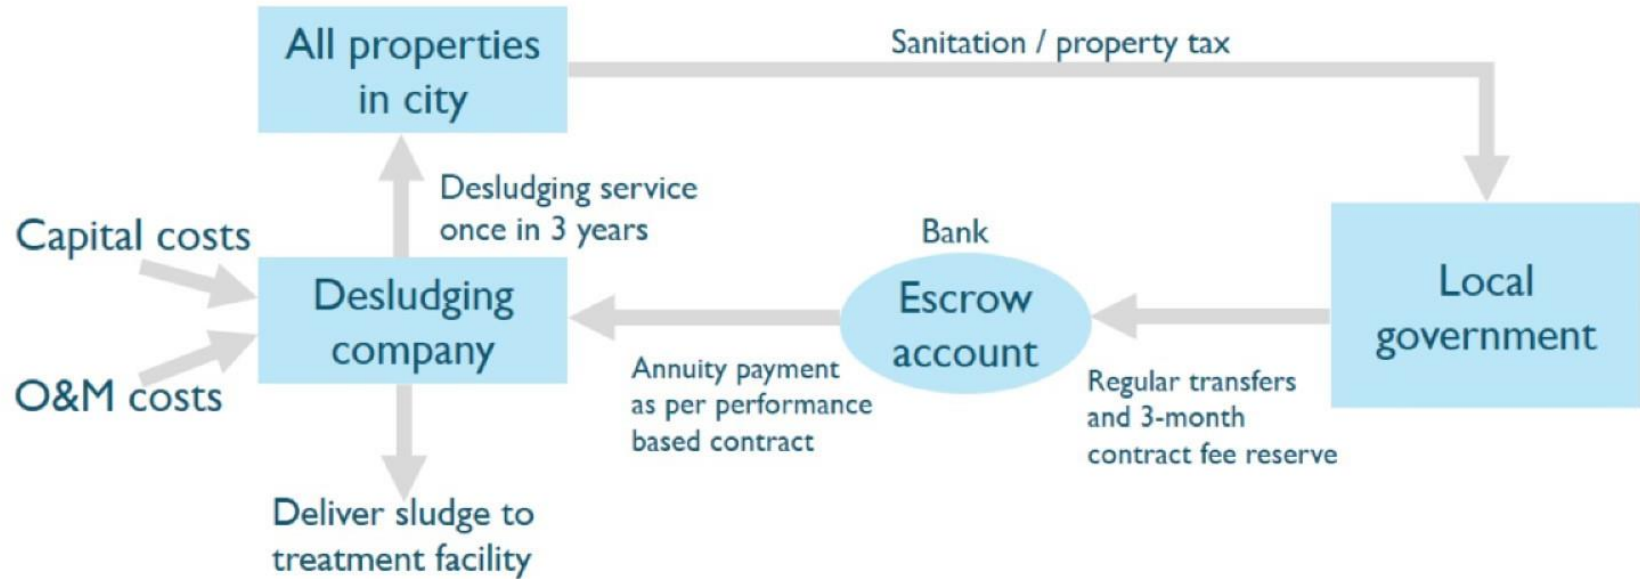

Households willing to construct toilet

Reason for lack of willingness to construct toilet

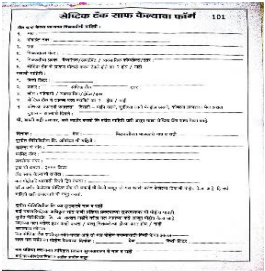

Performance linked annuity model for scheduled desludging ...

Scheduled septic tank desludging services started from June, 2018

Performance linked Monitoring Mechanism of desludging service

Existing paper based monitoring system to Online Monitoring System

This is a scanned image of a paper-based form titled 'Collection and transport record form' (in Hindi). It is marked as 'LG's copy' (Local Government's copy). The form contains various fields for recording details of waste collection and transport, including sections for waste generator information, waste details, and transporter information.

LG's copy

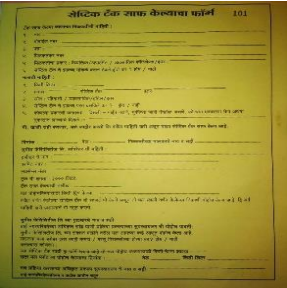

This is a scanned image of a paper-based form titled 'Collection and transport record form' (in Hindi). It is marked as 'Property holder's copy'. The form contains various fields for recording details of waste collection and transport, including sections for waste generator information, waste details, and transporter information.

Property holder's copy

This is a scanned image of a paper-based form titled 'Collection and transport record form' (in Hindi). It is marked as 'Treatment plant's copy'. The form contains various fields for recording details of waste collection and transport, including sections for waste generator information, waste details, and transporter information.

Treatment plant's copy

This is a scanned image of a paper-based form titled 'Collection and transport record form' (in Hindi). It is marked as 'Private operator's copy'. The form contains various fields for recording details of waste collection and transport, including sections for waste generator information, waste details, and transporter information.

Private operator's copy

Collection and transport record form Serial No: _____

i. Details of Waste Generator

a) Name : _____
b) Phone Number: _____
c) Address : _____
d) Property Tax Number : _____
e) Type of building : Individual house / Apartment / Commercial complex / Other (specify) _____
f) Was the Septic tank cover open (Yes / No) _____

ii. Identification of Waste:

a) Volume _____ liters
b) Type : _____ Septic Tank _____ Others _____
c) Source : Residential/Commercial/Restaurant/Others _____
d) Septic tank cover placed back on Septic tank : Yes / No _____
e) Septic tank emptied : Yes / No _____
f) Any kind of deficiencies, missing pipes or fittings, improper manholes or access covers, any other cracks or damage observed : _____

The undersigned being duly authorized does hereby certify to the accuracy of the source and type of Fecal Sludge and septage collected and transported.

Date: _____, Time: _____, Name and Signature – Property owner: _____

iii) Details of Sumeet Facilities Operator

a) Name of Driver : _____
b) Permit : _____
c) Vehicle License no : _____
d) Truck Capacity : _____
e) Pump Out Date : _____
f) No. of trips taken to empty the septic tank: _____

The above described wastewater was picked up and hauled by me to the disposal facility named below and was discharged. I certify that the foregoing is true and correct:

Name and Signature of authorized transport agent and title: _____

iv) Acceptance by Wai Municipality's authorized FSTP

The above transporter delivered the described Fecal sludge and Septage to this treatment facility and it was accepted.

The waste was contaminated with solid waste or other kinds of waste: YES / No _____

Details (if yes): _____

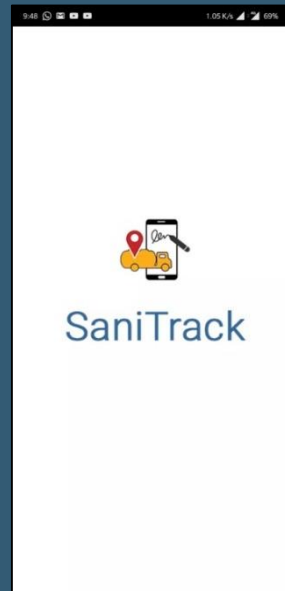

No of trips received at the FSTP for this form: _____

Septage received at treatment plant: Date: _____, Time : _____, Volume : _____ liters

Name and Signature of authorized treatment plant operator signatory and title: _____

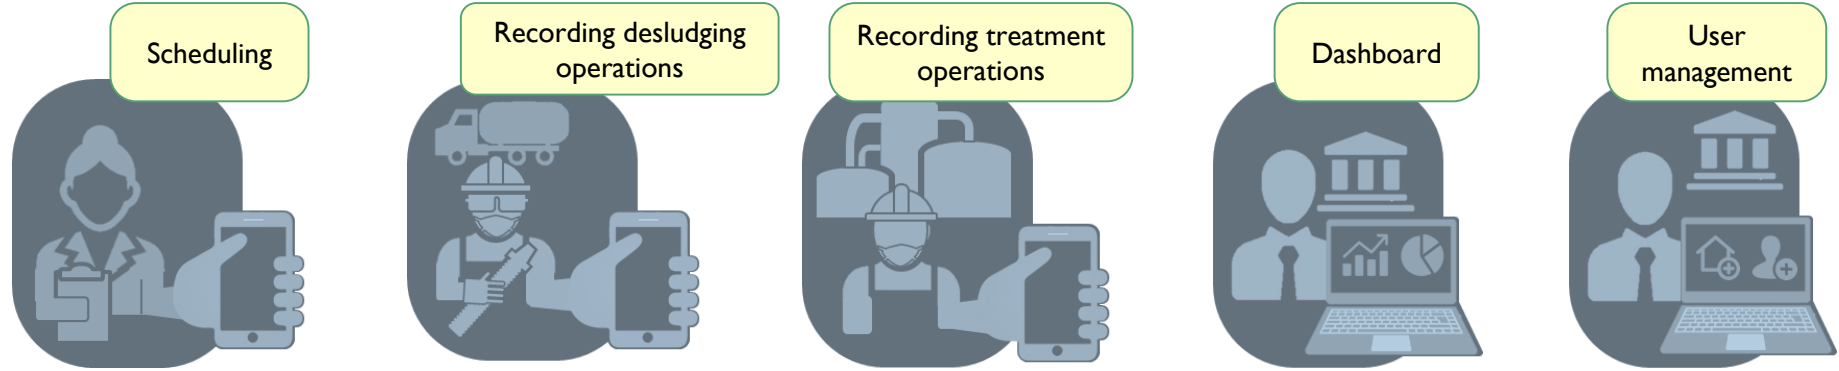

NOTE: SUBJECT TO THE TERMS AND CONDITIONS OF WAI MUNICIPALITY

SaniTrack

A screenshot of a web browser displaying the SaniTrack login page. The page has a white background with a light gray border. At the top, there is a SaniTrack logo. Below it, the text "Sign In" is centered. A sub-header reads "Sign in by entering the information below". There are two input fields: the first contains the email "admin@transerve.com" and the second contains a masked password "*****". A blue "Login" button is positioned below the password field. At the bottom, there is a link that says "Forgot password". The browser's address bar shows the URL "http://localhost:3000/login". The bottom of the browser window shows a Windows taskbar with icons for various applications and a system clock indicating 6:31 PM on 29/3/19.

SaniTrack - IT enabled systems

Online monitoring system for scheduled desludging

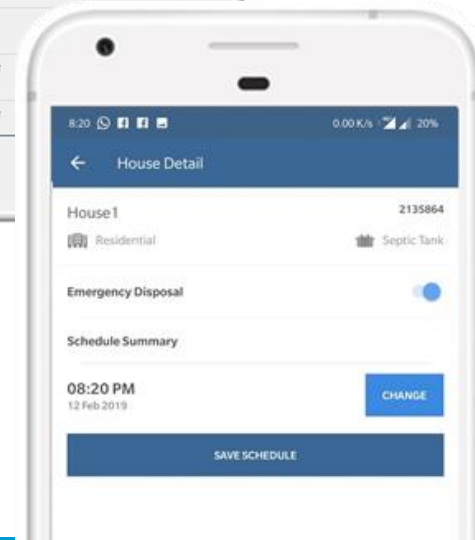

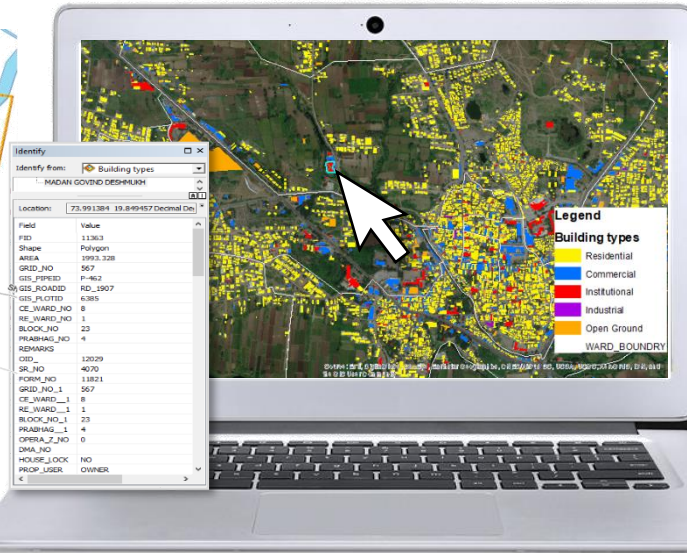

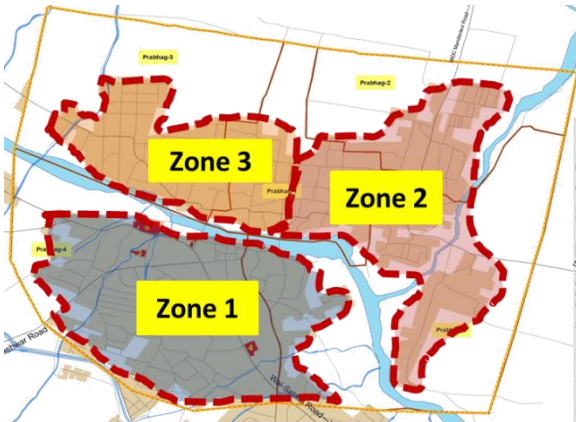

Monitoring and database creation system

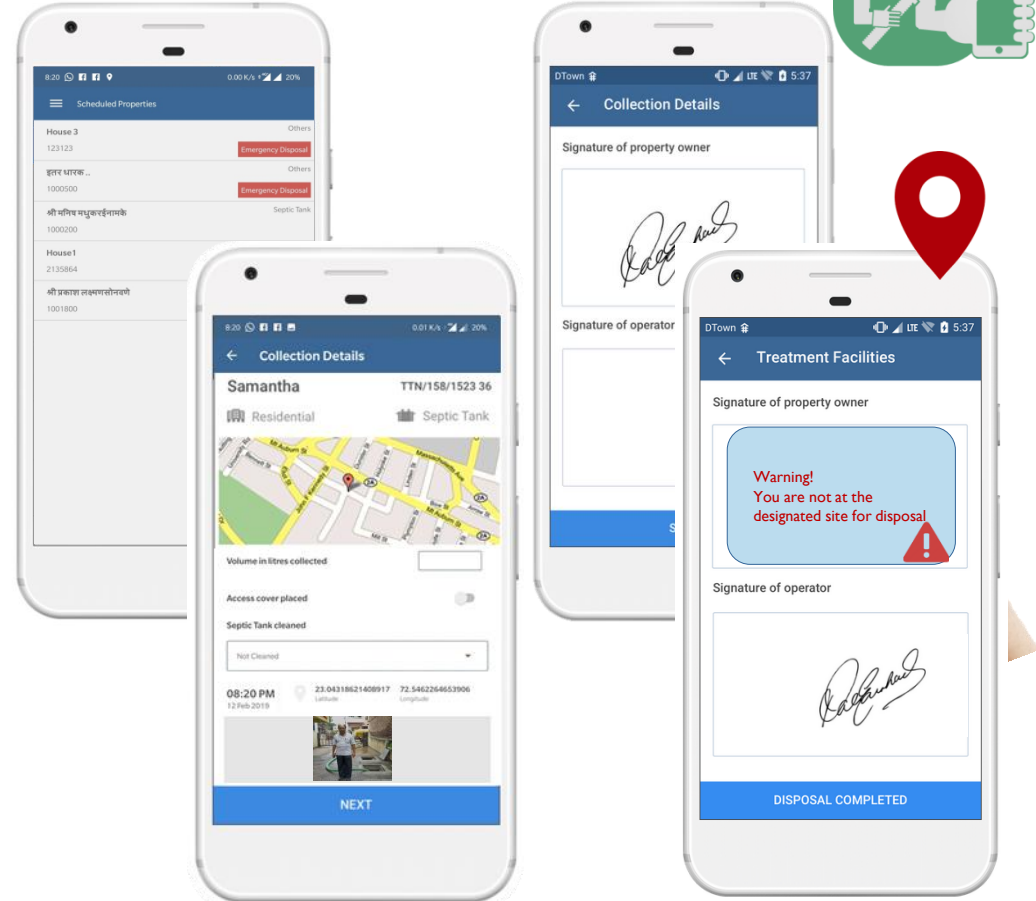

Module for desludging schedule

- City divided into 3 zones to be covered each year
- GIS linked property tax data - Basis for desludging scheduling / route mapping
- Prepare septic tank desludging schedule

Amazon delivery like app for desludging service operations

- Selects from 'scheduled' list
- Displays key property information
- Records desludging volume, status of access cover, photo of property
- Customer's & operator's signature – like Amazon delivery app
- Looping to collect from multiple properties in one trip or multiple trips for one property
- FSTP operator signature at disposal
- In-built validation checks

GPS enabled live desludging vehicle tracking system

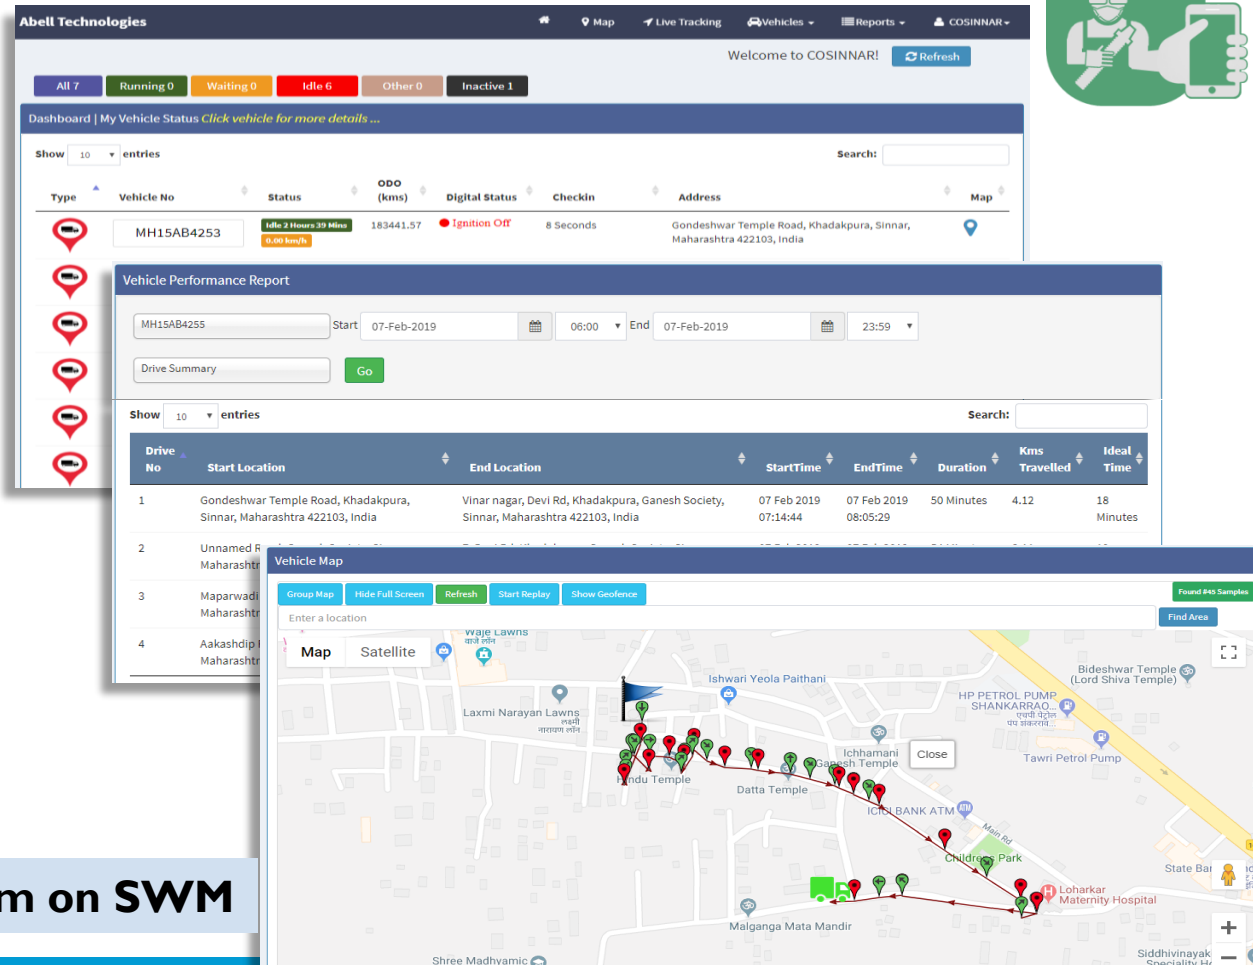

Live vehicle tracking

- Route tracking
- Speed tracking
- Odometer tracking
- Engine on-off tracking

Dashboard

- Vehicle status report
- Vehicle performance report
- Drive summary report
- Spatial view

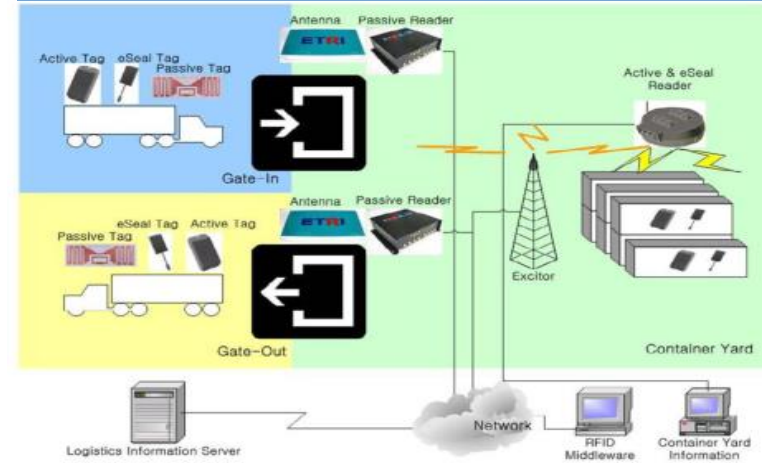

Integrated with existing system on SWM

Module on FSTP operations

- Captures safe unloading of collected sludge
- Interface to capture daily volume treated, quality testing results
- Alerts on web dashboard if results exceed permitted water quality levels

Radio-Frequency Identification (RFID) System @ FSTP

Online real time monitoring: Treated water quality discharge (multi parameter)

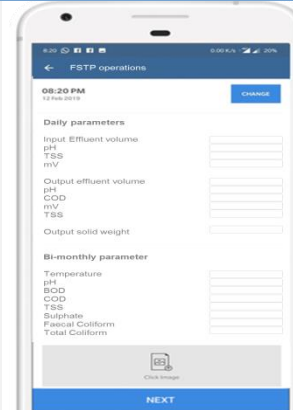

FSTP

Data Transfer

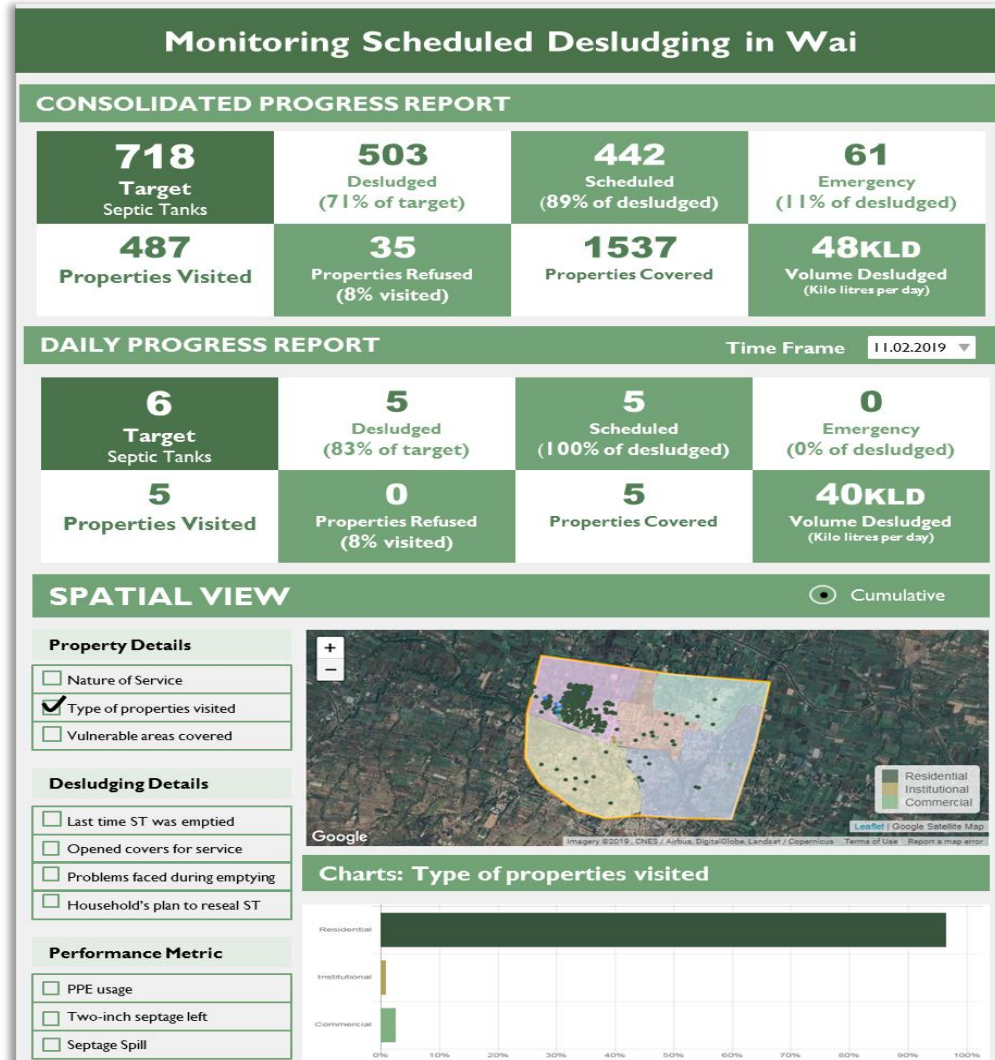

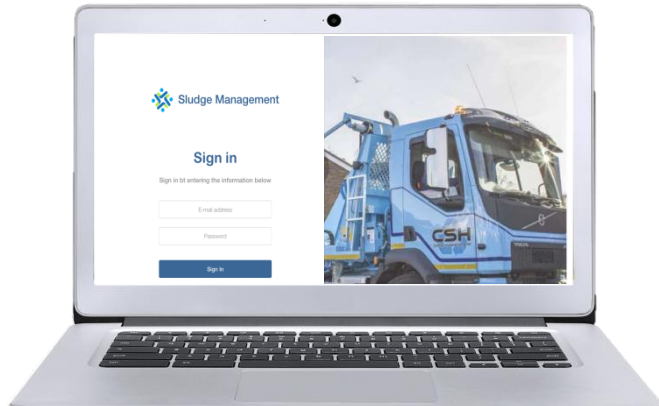

Client data viewer

Web module – Dashboard

- Login for different user types
- Dashboard to show real time progress
- Enables spatial information view
- Dashboard captures CWIS principles

Key Salient features

- Real time monitoring of schedule emptying service performance
- Online signature – like Amazon delivery app
- Real time stamping – start and end of operation
- Photo stamping – Capture property/ septic tank details
- Ensure safe disposal at FSTP through multiple checks
 - Online – Real time water quality monitoring
 - Installation of RFID tag @ trucks and @ FSTP
 - Real time truck running monitoring (GPS enabled trucks)
 - In-build validation checks in mobile application

Key Benefits - Program efficiency for FSM services

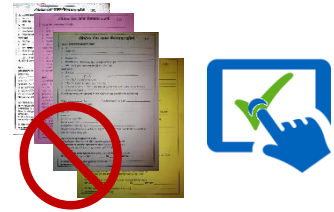

Integrated monitoring system
– Across FSM service chain

“Real time” monitoring
No need to process data for results

Easy to Operate,
Reduce paper work,
Minimize human error

Can view progress easily
and process payments

Citizen awareness about emptying
procedures

Inclusive – supports
vernacular language

Points to remember....

- A simple, user friendly integrated online FSM monitoring system
- Robust and integrated MIS/ Dashboard to track the real time progress
- Payment to be linked to online monitoring system (with multiple checks)
- SaniTab – Database creation of onsite sanitation for 85,000+ properties
- User guides and training modules are available for use of SaniTab tool
