

Experiences in piloting a LAPA on WASH in Nepal

Nepal Water for Health (NEWAH)
November 7, 2012

Presentation Outline

- ☐ NEWAH Introduction
- ☐ Pilot program locations
- ☐ Interventions
- ☐ Tools applied
- ☐ Community feelings
- ☐ Learning
- ☐ Challenges
- ☐ The way forward

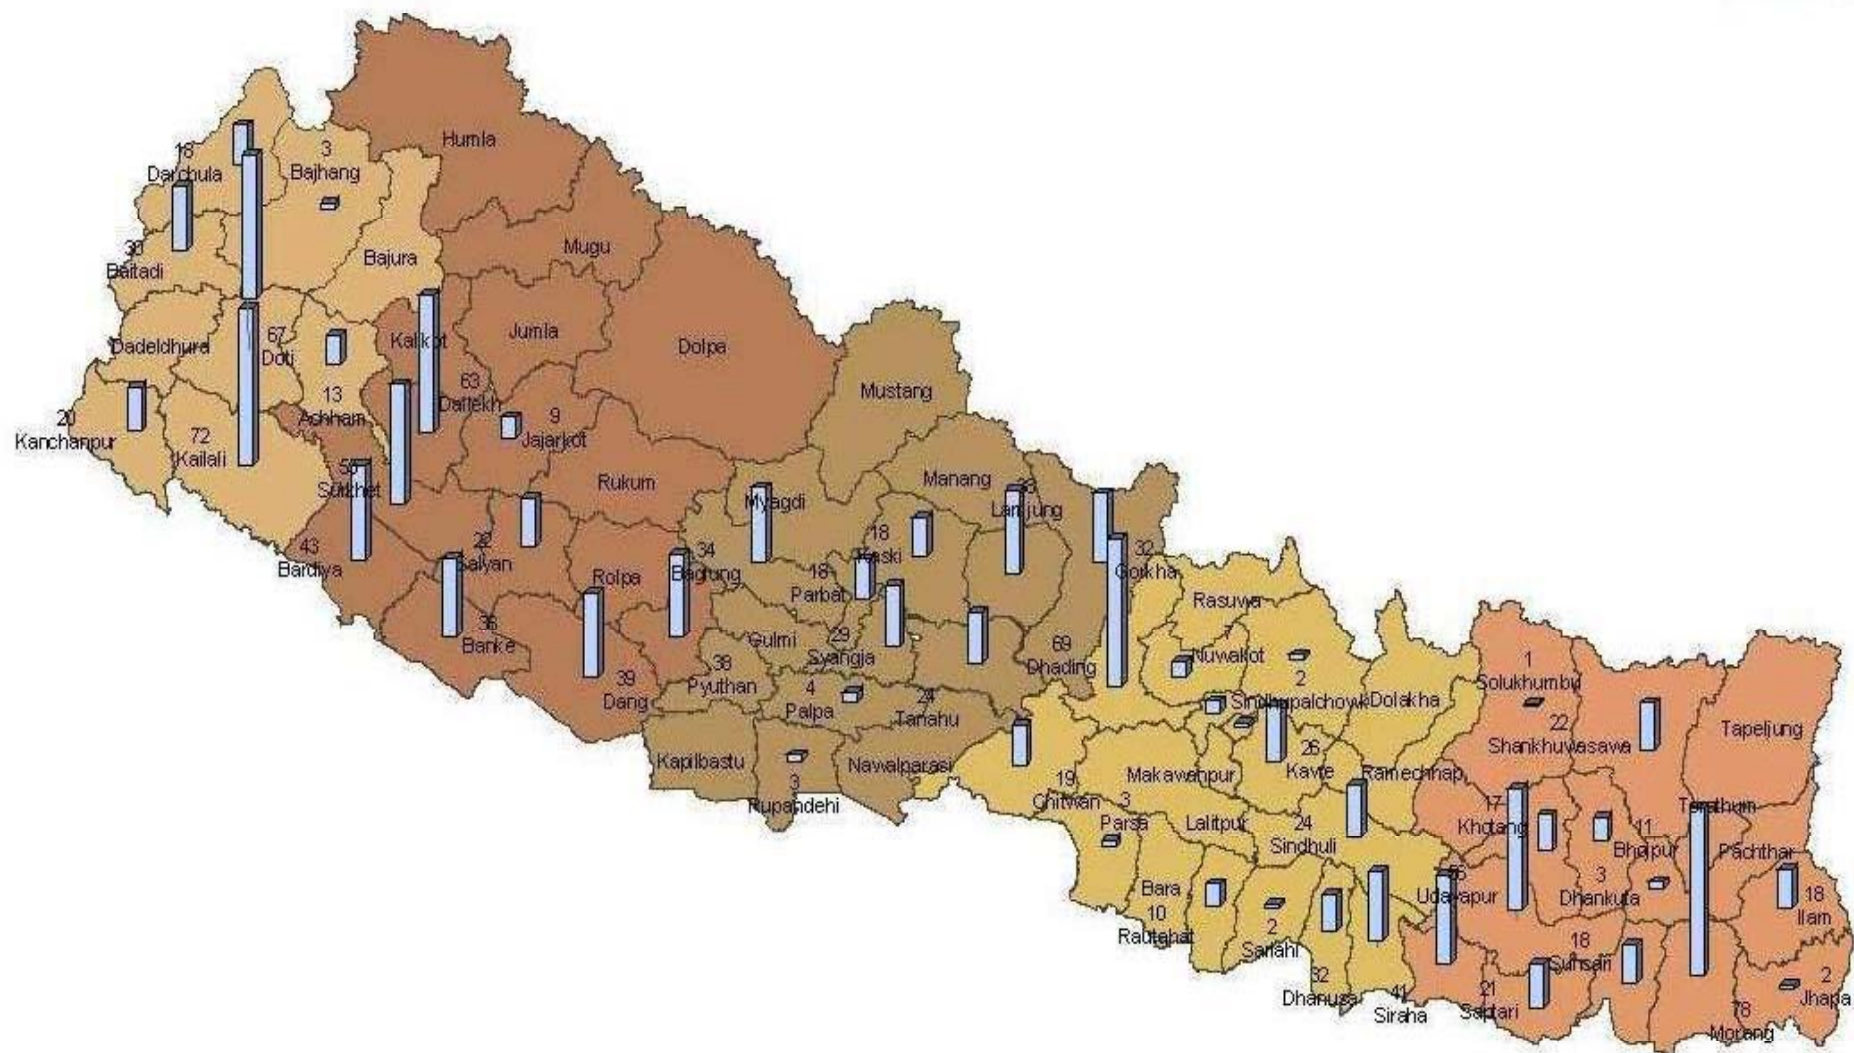

Introduction/Intervention

- ❑ National NGO specializes in WASH (1992)
- ❑ Partnership with INGOs, Bilateral funding agencies, local NGOs, CBOs & other sectors
- ❑ Served in 51 districts serving over one million people (estimated to be 4% of the national population through 1,570 WASH projects)
- ❑ HQ, 4 ROs, 2 DOs with around 220 professional staff

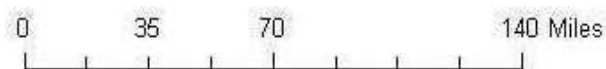

Served Districts

Note: 1230 Projects completed in 51 districts so far
Among them 96 projects are multi location projects
which are not shown in this map

Updated on: 11 August 2010

Program/Approach

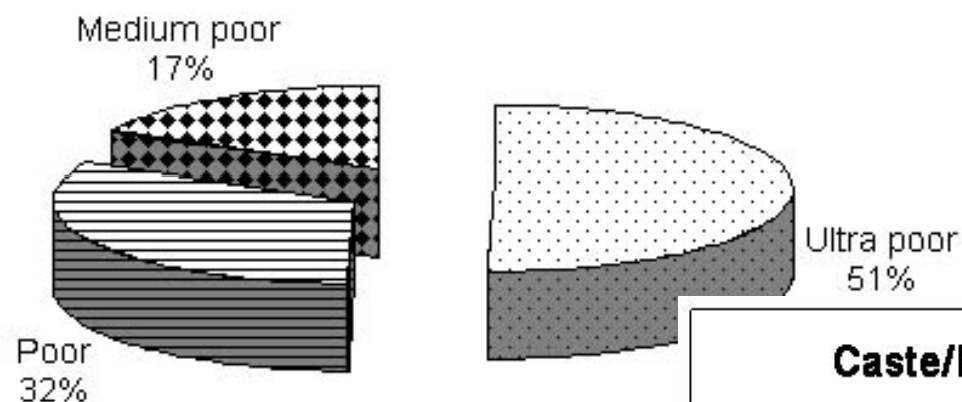

- ☐ WASH Services
- ☐ Capacity Building
- ☐ Research, Advocacy and Good Governance
- ☐ Emergency Support
- ☐ CLTS Approach
- ☐ GeSI Approach
- ☐ Right Based Approach/CR in WASH
- ☐ Community Based Monitoring System
- ☐ Multiple Use of Service
- ☐ WASH + (Nutrition, WASH in HIV/AIDS and etc.)
- ☐ CCA

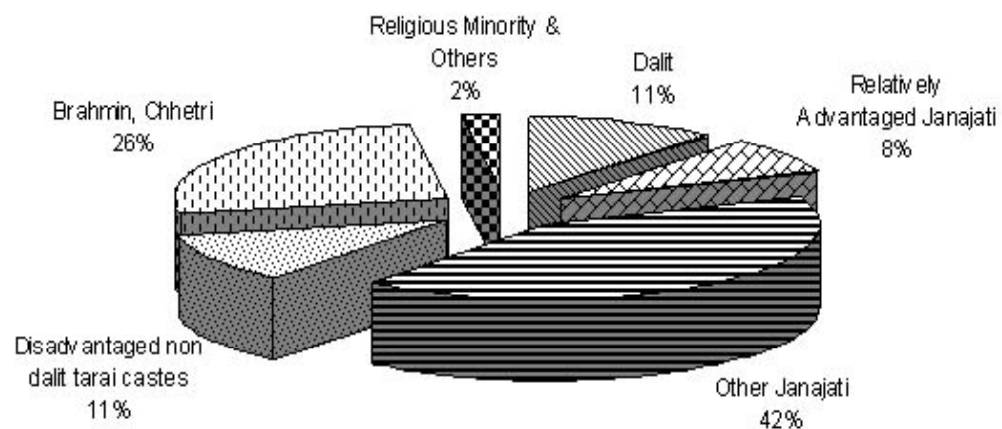

Focus Group

Socio Economic Classification of Beneficiaries

FY 209/010

Caste/Ethnic Classification of Beneficiaries

Pilot locations

- ❑ Gurase, Rauta VDC 9, Udayapur
September – December 2010

With the support of CADP-N for LAPA preparation

- ❑ **Kumikot**, Kunathari VDC 9, Surkhet
January – December 2012

- ❑ **Koiralachula Ghdasaini**, Salkot VDC 3, Surkhet
January – December 2012

With the support of AusAID and EWB Australia

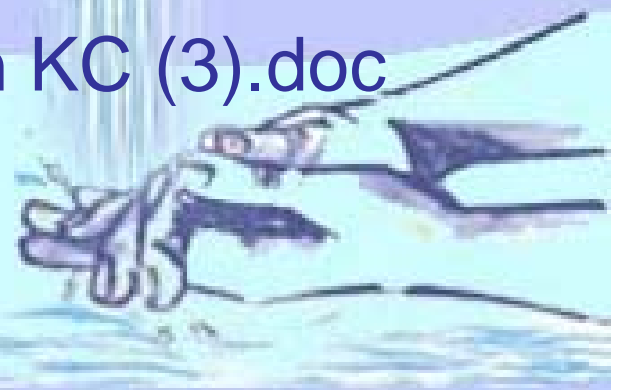

Interventions

- ☐ Staff sensitization orientation
- ☐ District level stakeholder sensitization workshop
- ☐ VDC level stakeholder sensitization workshop
- ☐ Community level sensitization workshop
- ☐ Community level climate change situation analysis and adaptation plan
- ☐ Support to include community level adaptation plan into VDC and District level plan
- ☐ Support to link adaptation plan with other agencies
- ☐ Support on adaptation plan on WASH part

Applied tools

- ☐ Historical reflection/time line Hist R sal.doc
- ☐ Seasonal calendar SC Salkot .doc
- ☐ Climatic hazard mapping
- ☐ Disaggregated vulnerability matrix dvm g.doc
- ☐ Gateway system/ access to services GateS.doc
- ☐ Climate vulnerability and adaptation assessment
HAA Koira.doc
- ☐ Prioritization of adaptation options Pri.doc
- ☐ Adaptation plan for action Ad Plan KC (3).doc
- ☐ Monitoring chart for plan MC.docx

Climate change effect/situation/feelings

- ☐ Increase temperature
- ☐ Change in precipitation
- ☐ Source depletion
- ☐ Increase disaster-land slide, flood, drought, fire
- ☐ High risk in water source, pipeline and structure
- ☐ Increase diseases - new diseases, diarrheal incidence, jaundice, typhoid etc
- ☐ Decrease agricultural product

Learning

- ❑ Climate change is a burning and concerned issue at local level also
- ❑ Cross cutting issue
- ❑ Multi sectoral issue and approach (forestry, energy, agriculture, health, WASH, cooperative)
- ❑ Proper orientation need to be done at all level (sensitization, policies, procurers, manual and plan)
- ❑ Community is interested for the adaptation work
- ❑ Local resources are available for adaptation
- ❑ Most of the adaptation work can perform by community themselves
- ❑ Focus need to be given on hygiene and sanitation as well
- ❑ Baseline data, sensitization workshop and adaptation plan should be done prior the program
- ❑ Ultra poor the main Climate vulnerable Disvulnerab matrix Gu.doc
- ❑ Some actions we are implementing need to be scale up (RWH,MUS, GeSI approach)

Challenges

- ☐ Multi sectoral issue and approach
- ☐ Trained human resource
- ☐ Budget
- ☐ Timing
- ☐ Priorities
- ☐ Policies and procedures

जलवायु परिवर्तनले खानेपानी र स्वास्थ्यमा पार्ने असर

- पानीको उपलब्धता
- पानीको गुणवत्ता
- पानीको मात्रा
- पानीको तापक्रम
- पानीको रसायन
- पानीको रसायन

The way forward

- ☐ Complete the pilot program
- ☐ Conduct staff workshop
- ☐ Sharing outcomes and learning with the broader WASH and development sectors
- ☐ Update policy
- ☐ Mainstream

Thank you
