DID YOU KNOW?
1 PERSON DIES EVERY 5 DAYS
AVERAGE LIFE EXPECTANCY: 45-50 YEARS

1. Sewer Cleaning
2. Railway Track Cleaning
3. Septic Tank Cleaning
4. Dry Pits Cleaning

Removing human excreta by bare hands using buckets and shovels.
CLEAN YOUR SEPTIC TANK!
PROTECT YOUR HEALTH!
Inspect & Empty your Septic Tank in every 2-3 years

WHERE DOES THE EMPTIED SLUDGE/SEPTAGE GO?

1. Properly Designed
   Septic Tanks are must in Non-Sewered Areas

2. Improper septic tank can cause contamination of water resources

3. Don’t flush diapers, wipes, others items down the toilet

4. Reduce water use Extend the life of tank

5. Keep septic tank cover accessible at all times

6. Ensure Septic Tank should be emptied once every 3-5 Years

7. Connect septic tank with soak pit for groundwater protection

WHAT IS THE SOLUTION !!

• Avail services from licensed vehicles only
• Ensure that vehicle transport the sludge to a dedicated treatment facility
• Treated sludge is easy to reuse or safe for disposal

CONSEQUENCES!
• Pollution of water bodies
• Disease Outbreak
• Unaesthetic Surroundings

WHERE DOES THE EMPTIED SLUDGE/SEPTAGE GO?

WHY?

SAVE MONEY
Inspections helps to find small problems that can be fixed before they become big, expensive ones

FAMILY HEALTH
Faecal sludge contains harmful pathogens that can make people sick. Malfunctioning septic systems can leak faecal sludge into your yard, leaving family and neighbors at risk.

BENEFITS COMMUNITY
Keep your system in good operating condition prevent sewage from entering into drains, water bodies and drinking water
