

## Setting up the context

---

# *National consultation on sustainable rural sanitation*

Sushmita Sengupta  
Water Programme

October, 2016

# Good sanitation practices even in not-so-prosperous districts

---

- Districts of Sikkim, Nadia (West Bengal) and Churu (Rajasthan) have achieved the success irrespective of the fact that they are not the rich districts of the country
- Poor district like Ganjam district of Odisha show high toilet usage

# Strong leadership and community participation

---

- Success came in Sindhudurg (Maharashtra) or Kurukshetra (Haryana), Sikkim, Nadia (West Bengal), Churu (Rajasthan) – where political or administrative will is there

# Need of the hour ....

---

- To understand the connection between health and sanitation
- There is need of correct design according to soil, topography and hydrogeology increase the usage
- Solid liquid waste management

# Key points of the agenda

---

- Presentation on sanitation coverage in India: Ms. Sunita Narain, Director General, CSE
- Remarks by Chief Guest: Mr. Parameswaran Iyer, Secretary, Drinking Water and Sanitation
- Presentation by successful districts and country
